Dainty Oak Collection

Authentic, Sustainable
Design Panels

Dainty Oak from Unilin is a neutral collection distinguished for its modernity and simplicity. Easily incorporated into any interior style with its wood-tones and patterns, Dainty Oak is the ideal TFL choice. Dainty Oak TFL imitates the woodgrain patterns and cathedrals of the architecturally popular Oak with a vibrant color-fast surface. Impact resistant and technologically advanced, choose this realistic woodgrain finish for your TFL needs.

UNILIN's high-quality panels use 100% recovered wood substrates which come in a variety of natural wood tones and neutrals. By using reclaimed wood as a raw material, UNILIN promotes sustainable products and processes. This allow UNILIN to keep wood in circulation for as long as possible and produce a truly biophilic product.

Features
